

Mold Remediation

Mold is a common concern and has five growth requirements, all of which are typically present in a water loss:

1

ORGANIC SOURCE paper, wood, etc

2

MOISTURE high humidity

3

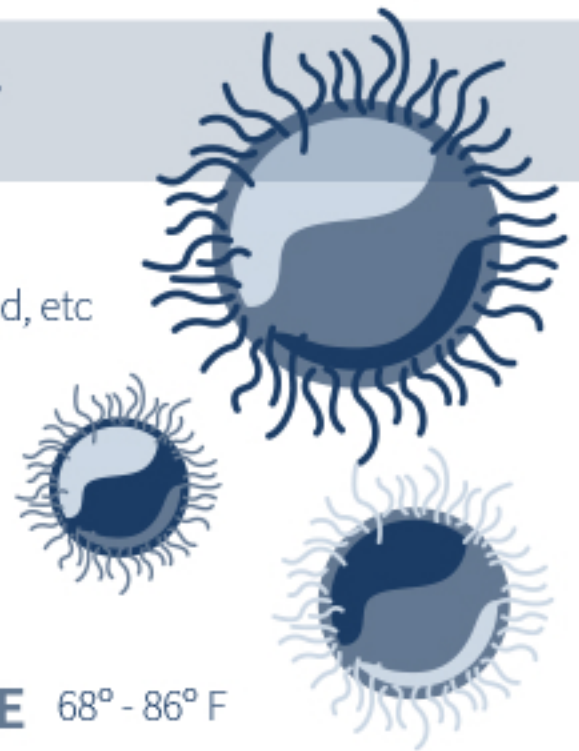

MODERATE TEMPERATURE 68° - 86° F

4

STAGNANT AIR lack of movement/circulation

5

TIME mold can grow after 24-48 hours under the first four conditions

K-tech's restoration technicians are IICRC certified, adhering to S520 industry standards for professional mold remediation which are ANSI (American National Standards Institute) approved.
